

What are cookies?

A cookie is a small (text) file that is stored by your browser on your computer when you visit our website. This information can be sent back to us on your next visit. This way our website can recognize you.

Why do we use cookies?

Cookies ensure that the website is fast and you can visit our website safely. The cookies also ensure that we can see how the website is used and how we can improve our website. In addition, our own cookies can be used to show advertisements that match your interests.

Which cookies do we use?

Functional cookies

These cookies are necessary for the website to work. Without these cookies, you cannot and some preferences (such as your language settings) cannot be saved.

Google Analytics

We use Google Analytics to test the quality and effectiveness of our website. This way we can see how the website is used and how we can improve the website. We have entered into an agreement with Google. That means that Google will not use the data collected by these cookies for its own purposes.

Tracking cookies

We ask for your permission to place tracking cookies. Based on the pages you have visited, we can show you advertisements that we think may be of interest to you.

How can I disable or delete cookies?

You can choose not to give permission for the placing of cookies. In the internet browser you can also set that cookies are blocked. How you can set this up differs per browser, most browsers explain this in the help function. If you block cookies, our website may not work properly.
